### What's New in the AutoCAD?

Create your own assembly instructions and add them to a drawing. Add notes, images, and text to help your customers when assembling your products. (video: 5:01 min.) Add your drawings and images to other projects, similar to how you can sync projects with Dropbox. You can also work with other drawings and see all updates across all your linked drawings. Data Table: Add data from other file types easily. By importing data, you can

instantly include and format Excel numbers, CSV files, and text files. (video: 1:45 min.) Get all of your data into an easy to use table. You can include formulas for related data and quickly sort your table. (video: 4:40 min.) Change data and formulas in multiple locations quickly. You can set your data table so that the value changes automatically as you move the mouse cursor over the data. (video: 1:38 min.) Drafting: The biggest change to AutoCAD in 2023 is new drafting. You will be able to navigate, rotate, and measure using only the mouse. You can also use the default tools that come with AutoCAD. The only time you need to switch to the mouse is when you want to change how you rotate, zoom, or pan. (video: 3:00 min.) CAD Tools: Work with 3D and 2D tools quickly and easily. Type faster and

work with the tools that you use every day. The one thing you have to remember is to give each tool its own color, so that you can easily identify each tool by color. (video: 3:38 min.) Create, modify, and work with 3D shapes. 3D shapes provide a variety of options for planning and designing 3D objects. (video: 1:42 min.) Use 2D tools. Modify 2D objects and shapes as easily as a 3D object. Move, rotate, and scale 2D objects quickly and easily. (video: 3:45 min.) User Interface: Design with your own toolbars and customization. You can add tools to your Tool Palette that you can use in the menu bar. Additionally, you can add your own toolbars to the window. (video: 2:00 min.) Remove extra menu items and customize your toolbars. You can customize the AutoCAD user interface to make it
