Bubble Browser (formerly Demon Browser) Download

Bubble Browser is a free & easy-to-use web browser that includes a fast & smart link search engine. When you open Bubble Browser you will notice how everything is laid out. The first thing you'll notice about the GUI (Graphical User Interface) is that there are 2 navigation buttons that are clearly labeled "HOME" and "Back". The first button is located at the very top of the browser window. The "Back" button is located just to the right of the "Home" button. When the "Back" button is pressed it will cause the browser to return to the last website the user was on. "Home" button is located at the very top of the browser window. When you click on the "Home" button it will take you back to the Bubble Browser home page. The links located to the right of the "Home" button are "Advanced Search" and "Back". Clicking on these buttons will take you to the respective websites. How to Activate the Bubble Browser: In order to activate the Bubble Browser click on the small "Menu" button located in the upper-left portion of the browser window. Once the "Menu" button is activated click on "Settings" located on the very bottom of the browser window. When "Settings" button is activated click on "Preferences" located on the right side of the browser window. Once the "Preferences" button is activated click on "Settings" located in the top right corner of the browser window. The "Settings" button will be activated once you click on it. Once you have clicked on the "Settings" button click on "Advanced". Once the "Advanced" button is activated click on "Reset Settings" located in the bottom right corner of the browser window. Once the "Reset Settings" button is activated click on "OK" located on the top right of the browser window. Click on the "OK" button in order to activate the Bubble Browser. How to Set your Password: In order to set a password for the Bubble Browser click on the small "Menu" button located in the upper-left portion of the browser window. Once the "Menu" button is activated click on "Preferences". Once the "Preferences" button is activated click on "Password Settings". When the "Password Settings" button is activated click on "Set
