Brolley Corn Wizard by MacGuffin Games is a sleek, fast-paced card game that comes with a full deck of...Diagnostic accuracy of light-painting as a diagnostic tool for oral cancer and pre-cancer: A systematic review and meta-analysis. Epidemiological studies indicate that the incidence of oral cancer is increasing worldwide, but the diagnostic accuracy of light-painting for early detection of oral cancer remains unclear. Therefore, we conducted a systematic review with the aim of evaluating the diagnostic accuracy of light-painting for detection of oral cancer and precancer. MEDLINE (January 2005-May 2016), EMBASE (January 2005-May 2016), Web of Science (January 2005-May 2016), CINAHL (January 2005-May 2016) and Cochrane Library (January 2005-May 2016) databases were searched to identify eligible studies. First, two reviewers independently screened all records according to the inclusion criteria and a third reviewer resolved any discrepancies. The Quality Assessment of Diagnostic Accuracy Studies 2 was then applied to assess the included studies. Statistical analyses were performed using random effect modelling. Fourteen studies were included in the meta-analysis (N=7,681 participants). Pooled sensitivity and specificity were 0.
