What's New In?

Space Screensaver will allow you to have beautiful images of the Earth in your desktop for as long as you like. You can customize the exit conditions and apply effects to the displayed images. The program allows you to save the images as.bmp,.jpg,.tif or.png files, and to set the format and size of the saved images (640x400x16, 640x480x16, 640x640x16, 640x800x16, 800x600x16, 1024x768x16, 1024x1024x16, etc.) It also allows you to set the color of the pictures using a color palette and adjust them with a color filter and a few other effects. To be able to use the full potential of the program, a.gif file is used to display the pictures. The program will automatically detect and load the available images from an attached.gif file. You can also select the image files in any folder of your choice, and the screensaver will automatically load the image files from the selected folder. You can choose between the file loading and the image set modes. With the file loading mode, the images are loaded from a.gif file, and then the images are displayed using the.gif file. With the image set mode, the images are loaded from a.gif file, and the images are saved as.bmp,.jpg,.tif, or.png files and then are displayed using the.gif file. You can also specify the number of seconds the images are displayed for. You can set the ScreenSaver to stop displaying the pictures automatically after the selected number of seconds, or you can use the "Start on boot" option to display the images on start-up. With the options you can set the minimum and maximum number of images to display, the type of color filtering used, etc. You can also use the options to set how the pictures are displayed (full screen, window, top-right corner, etc.) The program will also allow you to choose from a number of beautiful backgrounds to display with the images, and you can select a number of screensavers to use as the exit conditions. The program is very easy to use and there is no special knowledge required to use it. Features: - Over 50 unique images, including detailed images of the Moon and other planets and pictures of the Earth, taken from NASA. - All images are in the.gif format (640x480x16). - You can load the image
